Core	Overall, I rate this module	excellent	<p>n=11 av=1.27 dev=0.45</p>	poor
Engagement	I directed my own learning beyond the minimum module guidelines (e.g. reading beyond the booklist, attending, attending events related to the topic)	strongly agree	<p>n=11 av=2.55 dev=1.16</p>	strongly disagree
Engagement	On average, what was the total time you spent working on this module per week?		0-5 hours: 1 5-10 hours: 2 10-15 hours: 7 15-20 hours: 1 more than 20 hours: 0	
Freetext	Â Please indicate the aspects of this module that most helped you increase your confidence in your own knowledge and skills.		<p>Dr Tran is very approachable, especially with regards to helping on assignments, this made it easier for me to ask for help when I needed it. (I am a very shy person, so I found this very helpful)</p> <p>Dr Tran is a very engaging lecture and the small class size have been definite advantages in this module. Dr Tran has been able to answer any questions the class has, and explains things as many times as we need to understand. The lecturer was brilliant - probably the best I have had during my time here. Extremely engaging and friendly, as well as very knowledgable. Made the course interesting, accessible and enjoyable.</p> <p>Dr Tran is a wonderful lecturer and the course has been very enjoyable. I found that the method of assessment was a good measure of my progress in this module and believe that I have benefited from the style of assessment. The module material has encouraged me to direct my own learning and explore the topics in further detail. Overall, a very good module.</p> <p>Structure and frequency of assignments allowed me to keep on top of the course content, ensuring I understood things as we went along.</p> <p>The assignments were very helpful in making me learn the material during the semester and it has been really nice to see my progress.</p>	
Freetext	Â Please add any general		Personally, this is the only 5000 level module I have taken which has a coursework part (apart from my dissertation). I

	comments you would like to make about this module, e.g. what worked well and where improvements could be made.		<p>really like this, as firstly it gives me more motivation to keep up with my work in this module, as I was being assessed after each chapter. Secondly, it helped me to acknowledge the areas I need to improve on earlier than I may have done otherwise. And obviously it makes the exam slightly less daunting knowing coursework contributes to your grade. One improvement area: could provide a list of the basic maths skills you will be using at the beginning of the course, for example a lot of linear algebra and integration techniques have come up, along with Complex Analysis (the prerequisite) theorems. I know we should already know this stuff, but when your in fourth year and your trying to remember back to techniques used in your first/second year it can be hard. So it might be useful to have a list of topics that will crop up, so that before you attempt assignment/tutorial questions you could have already reviewed/reminded yourself of the topic. (I understand this stuff shouldn't be taught as it has already been taught)</p> <p>The only suggestion I would like to make is to have more examples or tutorial questions to practice the skills required in this module</p> <p>Perhaps an extra revision tutorial sheet with extra questions from each section. Assessments were interesting, although perhaps more weight could be added to them, as they were a large amount of work.</p> <p>I feel that Dr Tran could try to be clearer when explaining things as he speaks quite quietly.</p> <p>Some things could be explained a little more clearly, particularly relating to the method of steepest descents. Personally I think that this module has been great. It is quite pure so rather challenging for me, but Chuong's open door policy has made it manageable. The assignments are great for forcing me to learn the material throughout the year. The only improvement I can think of is that I would prefer having more solutions to past exam papers online (even answers would be sufficient). The best aspect of the module has been Chuong, he has been one of my favourite lecturers at this university so far. His open door policy and genuine desire to make us learn things set an example for the whole department. Give the man a raise, he honestly deserves it!</p>	
Lecturer (Chuong Tran)	Lecture material was well organised	excellent	<p>n=11 av=1.09 dev=0.29</p>	poor
Lecturer (Chuong Tran)	The lecturer was good at explaining things	excellent	<p>n=11 av=1.55 dev=0.66</p>	poor
